Aluraflux ONE – Oracle Alura LATAM

June 2023

Alura website with similar features to Netflix.

- Replicating and improving the UI provided by ONE, own UX design and implementing responsive design.
- Using and developing on the Firebase platform for the Back End where the components: Authentication and Realtime Database were used.
- Used React along with JavaScript to interact with the DOM and leveraged the Fetch API to run CRUD operations, ensuring all JavaScript code works asynchronously.
- The website was part of a ONE Program Challenge.
- Tools used: React, HTML, CSS, JavaScript, Trello, Figma, Git, GitHub and Vercel.

E-commerce Alura Geek Store – Oracle Alura LATAM

April 2023

E-Commerce Management Website

- Replicating the UI provided by ONE, own UX design and implementing a responsive design.
- Using and developing on the Firebase platform for the Back End where the components were used: Authentication, Storage and Realtime Database.
- JavaScript to interact with the DOM, relying on the Fetch API to carry out CRUD operations, as well as making sure that all JavaScript code works asynchronously.
- The website was part of a ONE Program Challenge.
- Tools used: HTML, CCS, JavaScript, Firebase, Trello, Figma, Git, Github and Github Pages.
